

## Automatic Lubricant Filling Machine PLC Controlled 1L-5L Linear Type

Our Product Introduction

for more products please visit us on tom-packs.com

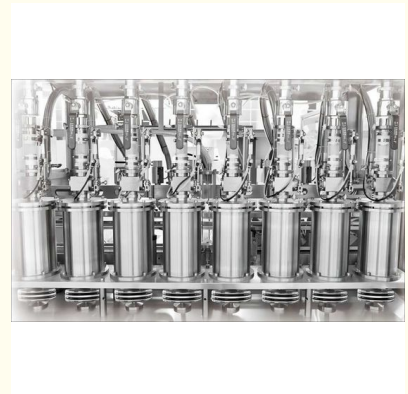

### Basic Information

- Place of Origin: China
- Brand Name: TOM
- Certification: CE/ISO9001
- Model Number: DGP-Z-12DL
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: Sea Worthy Packing
- Delivery Time: 30 Working Days
- Payment Terms: L/C, T/T
- Supply Ability: 10 sets per month

### Product Specification

- Automatic Grade: Automatic
- Type: Piston Filling Machine
- Warranty: 1 Year
- Voltage: 220/380V
- Materials: SUS304
- Capacity: 2400 Bph For 5L
- Filling Accuracy:  $\pm 4g$
- Filling Head: 10
- Highlight: **Automatic Lubricant Filling Machine, 5L Lubricant Filling Machine, 1L lubricant packaging machine**

## DGP-Z-12DL PLC Controlled 1L-5L Linear Type Automatic Lubricant Filling Machine

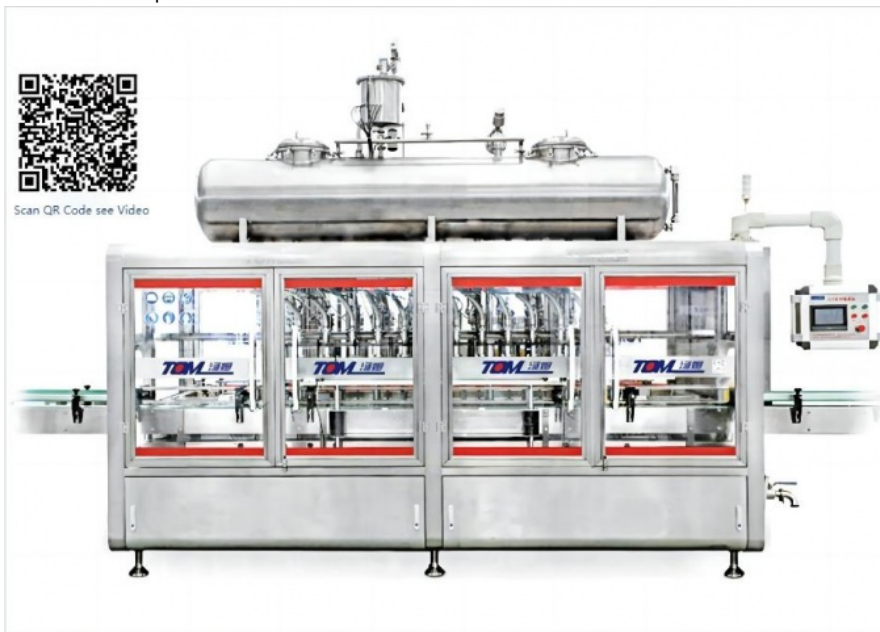

### summarize:

It is special designed piston filling machine which following the lubricant characteristic. The overall performance has reached the international advanced level, some of the performance has exceeded the best level of similar foreign products, and has been recognized by the world's giant companies. This product is a linear piston filling machine, with PLC and touch screen automation control, with accurate measurement, advanced structure, stable operation, low noise, wide adjustment range, filling speed and other advantages;

### Major Parameters:

NO.	Name	Parameter
1	Machine's size(L×W×H)	3000mm×1300mm×2500mm
2	Weight	about 1500kg
3	Filling range	1L-5L
4	Power supply	AC380V 50HZ
5	Max power	About 4.5kw
6	Pneumatic air source/air consumption	0.6MPa clean and stable air source; 18m <sup>3</sup> /h
7	Capacity	About 2400BPH for 5L
8	Filling Head	10 heads
9	Packing line's height	950mm±50mm

Machine's Main picture:

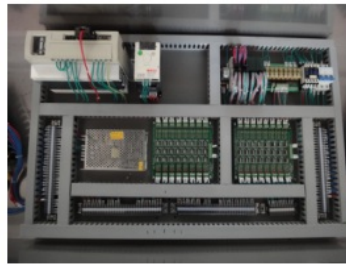

### Detailed introduce:

The adjustment of the filling volume can be coarsely adjusted and each feeding head can be individually adjusted, the touch screen can be operated; the residual liquid collection tank with independent control under the filling head is provided, Ensure that the liquid does not contaminate the bottle mouth, equipped with clip bottle holder, to ensure that the mouth and bottle mouth 's center stay in same position; filling head lift along with the liquid level; replacement bottle, filling head without tools can be artificial fast Adjustment;

**Electrical part:** use import electrical element, such as Panasonic from Japan, Schneider from France, more than 10 years of commissioning experience, and market feedback, stable, and durable.

**Circulation cleaning system:**

The material tank of the filling machine adopts a new design. The main body of the material tank is cylindrical, with arc-shaped heads on both sides, and the inside and outside are all polished. It meets the GMP requirements

The cleaning function is the most innovative design developed by our company. This function can greatly shorten the cleaning time of the replacement material types, realize unmanned cleaning, save human resources to the greatest extent, and avoid direct contact between operators and materials. Guarantees the safety of the operator. This one for your choice, not including

in the quotation.

**Packaging & shipping:**

**Company Overview--Jiangsu Tom Group**

Company covers an area of 150 mu

Office building
