Good looking appearance, stable running

Small structure, save space

The movement seat can be used in a variety of tape sizes, and can use 1000 yards of tape to reduce frequent replacement and improve production efficiency.

With airtac cylinder control movement, the tape is cut more accurately, avoiding tape waste and saving resources.

Simply turn the adjusting wheel manually and adjust it to the width and height of the packing. It is suitable for a wide range of cartons. With universal casters and brakes for flexibility and effort.

Detecting sensor for good detecting effects

The pattern conveyor belt is used to increase the friction with the surface of the box to ensure the stable advancement of the box and the perfect sealing and high wear resistance.

The clamping belt can clamp carton firmly to achieve more good working effects.

Delivery: packed by wooden case and delivery to Shanghai Port, the wooden case is suitable for long-term sea delivery
