

## High Filling Accuracy Lubricant Filling Machine - Filling Volume 200-1000KG

### Our Product Introduction

for more products please visit us on [tom-packs.com](http://tom-packs.com)

#### Basic Information

- Place of Origin: China
- Brand Name: TOM
- Price: Negotiable

#### Product Specification

- Speed: 50-10000 Bottle Per Hour
- Product Name: Lubricant Filling Machine
- Filling Volume: 200-1000KG
- Capacity: Customized
- Filling Accuracy: High
- Driving System: Servo Motor
- Power Supply: 220V/380V
- Operation Mode: Automatic

## Product Description:

This newly developed machine is designed for filling 200L barrels. It features multiple azimuth rotation, allowing the worker to adjust the filling head to fill the drum. It is perfectly suited to tasks involving quantitative filling of water, oil, paints, lubricant oils, and soy lecithin. Indeed, it is an ideal packing machine for lubricating oil, medicines, cosmetics, and fine food industries. The whole production process is carried out in three stations. The first station is for putting empty drum on a feeding rack. Then, the empty drum is automatically sent to the filling station, where the worker adjust the filling head for drum filling. Afterwards, the filled drum is automatically directed to an outlet station where the worker caps it.

## Features:

**Lubricant Filling Equipment:** Lubricant Filling Machine

**Control System:** PLC

**Filling Volume:** 200-1000KG

**Driving System:** Servo Motor

**Power Supply:** 220V/380V

**Filling Accuracy:** High

**Automatic Lubricant Oil Filling Machine:** Yes

**Bearing Grease Filling Machine:** Yes

## Technical Parameters:

Parameter	Value
Product Name	Lubricant Filling Machine
Operation Mode	Automatic
Filling Speed	High
Filling Volume	200-1000KG
Power Supply	220V/380V
Material	Stainless Steel
Driving System	Servo Motor
Speed	50-10000 Bottle Per Hour
Service	OEM/ODM
Control System	PLC

## Applications:

TOM Brand Automatic Grease Filling Machine

The TOM brand Automatic Grease Filling Machine is a reliable and efficient oil filling device manufactured in China. It is designed with a high filling accuracy and an advanced control system, using a PLC controller to ensure accurate filling. With a power supply of 220V/380V, this machine can fill 200 to 1000 kg of oil or lubricant with precision. It is an ideal choice for OEM/ODM service, providing consistent and accurate filling results, and great convenience for users.

The TOM Automatic Grease Filling Machine is an ideal choice for industries that require precision filling of lubricants and oil. It is widely used in automotive lubricant and oil production, as well as in the manufacturing of food, beverage, and pharmaceutical industries. With its high-end design, it is also suitable for use in the production of cosmetics and other consumer products. This automatic lubricant filling machine is simple to operate and maintain, and can provide high-quality filling results in a short time.

## Support and Services:

Lubricant Filling Machine Technical Support and Service

We provide professional technical support and service for our Lubricant Filling Machine products. Our technical support and service includes:

24/7 technical assistance and on-site service

Regular maintenance and troubleshooting

Technical advice and guidance

Software updates and upgrades

Spare parts and accessories

We also offer training services to ensure that customers can operate and maintain the Lubricant Filling Machine safely and efficiently.

## Packing and Shipping:

Packaging and Shipping for Lubricant Filling Machine

The Lubricant Filling Machine is packaged carefully and securely before being shipped to the customer. The packaging material used is designed to protect the machine during transit and is made of strong and recyclable materials.

The machine will be transported in a large cardboard box. The box is designed to provide maximum protection against impacts, shocks, and other external forces. All the components of the machine will be individually packaged and placed in the box. The box will be clearly labeled with the customer's address and other required information.

The Lubricant Filling Machine will be shipped using a reliable courier service. The customer will be provided with a tracking number for the shipment, which can be used to monitor the progress of the shipment. The shipment is expected to reach the customer within 3-5 working days.

## FAQ:

Q: What is the Brand Name of your Lubricant Filling Machine?

A: Our Lubricant Filling Machine is from TOM which is produced in China.

Q: Where is the Lubricant Filling Machine produced?

A: The Lubricant Filling Machine is produced in China.

Q: Does the Lubricant Filling Machine have a power on/off switch?

A: Yes, our Lubricant Filling Machine is equipped with a power on/off switch for your convenience.

Q: How long does the Lubricant Filling Machine take to fill a container?

A: It takes about 5 minutes for our Lubricant Filling Machine to fill a container.

Q: What type of lubricant can the Lubricant Filling Machine fill?

A: Our Lubricant Filling Machine is able to fill a variety of lubricants such as motor oil, hydraulic oil, and gear oil.
