

## 3000-15000 Bottle Per Hour Monoblock Filler Capper Machine with Accurate Liquid Level Sensor and Suitable Bottle Diameter

Our Product Introduction

for more products please visit us on [tom-packs.com](http://tom-packs.com)

### Basic Information

- Place of Origin: China
- Brand Name: TOM
- Model Number: DGP-CZ

### Product Specification

- Air Pressure: 0.6-0.8MPa
- Filling Head: 16/20/32/48 Heads
- Control System: PLC And Touch Screen
- Electronic Element: Siemens, Schneider Or Panasonic
- Power Consumption: 2.5KW
- Liquid Level Sensor: Including
- Speed: 3000-15000 Bottle Per Hour
- Capping Type: Pressing Or Screw
- Highlight: **Monoblock Filler Capper Machine**

## Product Description:

The machine is equipped with a liquid level sensor that ensures the precise filling of products. It also features high-quality electronic elements from renowned brands such as Siemens, Schneider, or Panasonic. This ensures the reliability and durability of the machine, making it an ideal investment for any industry that requires a chemical filling and capping machine.

The Monoblock Filler Capper Machine is suitable for bottles ranging from 100ml to 1L or 1-5L, making it a versatile machine that can accommodate a wide range of products. Whether you are filling and capping shampoo, cooking oil, or pesticides, this machine is designed to meet your needs.

Overall, the Monoblock Filler Capper Machine is a reliable and efficient machine that can streamline your production process and improve your bottom line. With its high-quality components, accurate filling capabilities, and versatile bottle size range, this machine is an excellent investment for any industry that requires a chemical filling and capping machine.

## Features:

Product Name: Monoblock Filler Capper Machine

Suitable Bottle Diameter: Design According Sample

Liquid Level Sensor: Including

Filling Head: 16/20/32/48 Heads

Air Pressure: 0.6-0.8MPa

Speed: 3000-15000 Bottle Per Hour

Product features:

1-5L rotary filling and capping

Oil filling line

Rotary filling and capping machine

## Applications:

One of the key benefits of this machine is its ability to handle both filling and capping in a single operation. This makes it an ideal choice for businesses looking to streamline their production process and increase efficiency. The rotary filling and capping machine is designed to work with a variety of capping types, including pressing and screw, making it a versatile choice for a range of products.

The TOM DGP-CZ Monoblock Filler Capper Machine is also equipped with high-quality electronic elements from Siemens, Schneider, or Panasonic, ensuring reliable and consistent performance. The control system is operated via a PLC and touch screen, providing easy-to-use and customizable settings for a range of applications.

Thanks to its versatility and efficiency, this edible oil filling and capping machine is well-suited for a range of occasions and scenarios. For example, it can be used in food production facilities to fill and cap sauces, dressings, and other liquid products. It can also be used in pharmaceutical manufacturing to fill and cap medications and other products.

In summary, the TOM DGP-CZ Monoblock Filler Capper Machine is a reliable and versatile solution for a range of filling and capping applications. Whether you are producing edible oils, pharmaceuticals, or other liquid products, this machine is designed to deliver consistent and efficient results.

## Customization:

Our Monoblock Filler Capper Machine is designed to streamline your oil filling line, with a voltage of 220/380V and machine power supply of AC380/220V±10%,50/60Hz. It also comes equipped with a liquid level sensor and control system featuring PLC and touch screen technology. Plus, with its servo motor type, you can trust in the precision and accuracy of every fill and cap.

At TOM, we understand that every business has unique needs and requirements. That's why we offer product customization services to ensure our Monoblock Filler Capper Machine meets your specific needs. Contact us today to learn more about how we can customize our machine to fit your business perfectly.

## Support and Services:

The Monoblock Filler Capper Machine is a high-performance packaging machine designed to fill and cap various types of bottles and containers. Our product technical support and services include:

Installation and commissioning

Operator training

Regular maintenance and servicing

Technical troubleshooting and support

Spare parts supply and replacement

Upgrades and customization

Our team of experienced technicians and engineers is dedicated to ensuring the optimal performance and reliability of your Monoblock Filler Capper Machine. Contact us for more information on our product technical support and services.

## Packing and Shipping:

Product Packaging:

The Monoblock Filler Capper Machine will be securely wrapped in bubble wrap to prevent any damage during transit.

The machine will then be placed in a wooden crate for added protection.

All necessary documentation, including the user manual and warranty information, will be included in the package.

Shipping:

Shipping will be arranged by the customer or the seller, depending on the agreed terms of the purchase.  
The machine will be shipped via a reputable carrier to ensure timely and safe delivery.  
The customer will be provided with a tracking number and estimated delivery date once the machine has been shipped.
